LETTER OF RECOMMENDATION

I had the pleasure of teaching Bushra Khandoker in her seventh to twelfth-grade honors English class at Military Collegiate School Khulna (MCSK). The whole school was impressed by Bushra Khandoker, who secured first place in the Physics Olympiad in Jessore, competing against more than 100 students. It was the first time any student from our school had achieved this milestone. Her dedication to studies is so intense that I often see her studying in the library even during rest periods. When the library was closed, she would continue studying outside. She was one of the few students in my career who consistently raised her hand in class. Even outside of class, she would approach me with various questions, eager to learn. She was one of the few students I have encountered in my career who consistently participated in class discussions. Even outside of class, she would regularly approach me with insightful questions, eager to expand her knowledge. Her dedication and curiosity are truly exceptional. She is not only outstanding in STEM-related fields but also excels in English, foreign languages, and other subjects. She has consistently ranked among the top three students in the classroom. In my class, she was always ranked first, and I have rarely seen a student who maintains a rank in the top 1% of the class. Bushra served as a house prefect for one year and a junior house prefect for six months. Under her leadership, her house consistently won the inter-house magazine (e.g., Wall Magazine), essay competitions (e.g., MCSK Essay, Inter-house Essay, etc.), and science competitions (e.g., Inter-house Science Fair), along with the inter-house cleanliness and discipline competitions. She also played a key role in the robotics club, contributing to the development of Gusto, a virtual assistant with facial recognition capabilities. She was the first student to introduce AI to the robotics club, and her innovation inspired the junior cadets to follow in her footsteps and work on new tech projects. Though it was a boarding school, she always found it challenging to balance extracurricular activities and academics due to limited self-study time and mandatory morning PT sessions and afternoon game sessions. However, she put in her best effort to excel in everything. She was one of the rare students I have seen who was equally outstanding in both academic and extracurricular activities. She consistently ranked between 1st and 3rd place in essay writing competitions, painting competitions, Olympiads, and other inter-house competitions and was one of the most disciplined students in our school. As a result, she received the Best Cadet Award in 2017 and was elected class prefect from grades 7 to 11. She was also appointed house prefect, a role awarded based on academic performance, discipline, integrity, contribution to the house, leadership, self-confidence, and responsibility. She was awarded scholarships for her performance in the final exams of grades 8, 10, and 12, all administered by the Jessore Education Board in Bangladesh. Notably, she was recognized as the Best Student in Phultola Upazila in 2023.

It has been an honor to have such an exceptional student. I watched her during a study tour in 2022 when she selflessly gave all her money to the stray children on Saint Martin's Island. Instead of spending time with her friends, she chose to play with the children and truly enjoyed the experience. Later, as we were leaving during the study tour, an elderly woman approached her, asking for food. Bushra asked for a moment before boarding the bus, and we waited as she went to a restaurant and used all her savings to buy a meal for the woman. I was deeply moved by her kindness. Sometimes, I feel that she does everything out of curiosity and tends to overlook things she doesn't find interesting. However, she is actively working to overcome this, and I have no doubt that she will bring her talents and growth to your institution with distinction.

Sincerely,

MD. SHISHIR SAIDY
